Your App, Your Design..

Features..

Find out more about the App...

Your Branding

That's right — your logo, your colours, your custom design. The app is a true reflection of your business and brand.

Integrated Stock

Yep - Your stock integrated into your app without you lifting a finger.

‘Sleeping Salesperson’ (with VRN recognition)

With just one photo of a number plate, your customer can apply for a car — meanwhile, your team is busy mastering the art of ‘looking productive.’

PDF Document Scanner

Another little time-saver for your team — customers can snap a pic of their documents, and voilà! it’s instantly turned into a tidy PDF.

No more chasing blurry WhatsApp screenshots, no more “Can you just resend that?”

Great for your old-school customers who still think fax machines are cutting-edge.

Remote Part Exchange Valuation System

Not quite magic — but close. A built-in remote valuation tool powered by CAP data. Your customers take a few photos, add key details, and you get the full report straight to your dashboard.

Who needs staff?

Existing Customer

Where the magic happens — your app automatically keeps customers in the loop with MOT, service, or upgrade reminders. Or you can jump in with custom messages about deals, new stock, or a “refer a mate” nudge.

What Else..?

Monetize

Make your app your hardest working employee — earning from MOTs, services, upgrades, referrals, warranties, and insurance renewals.

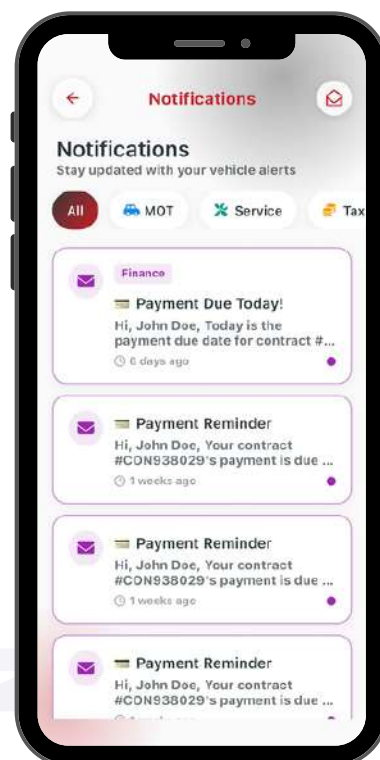

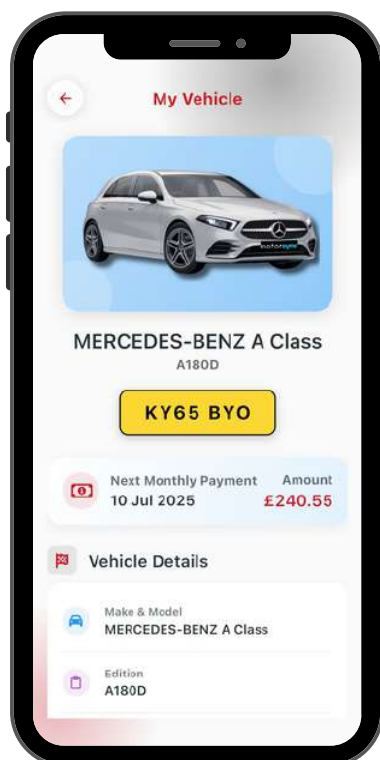

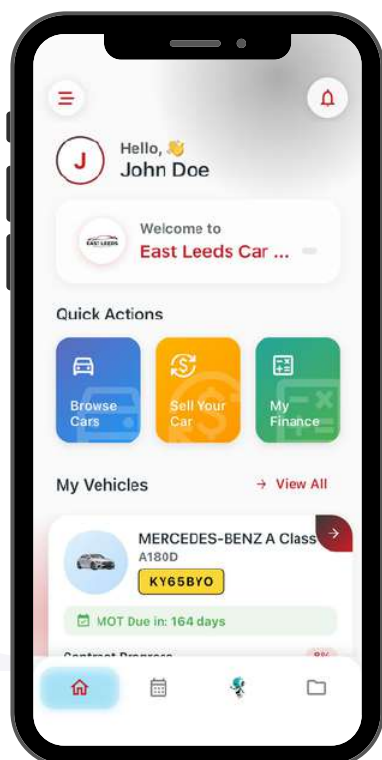

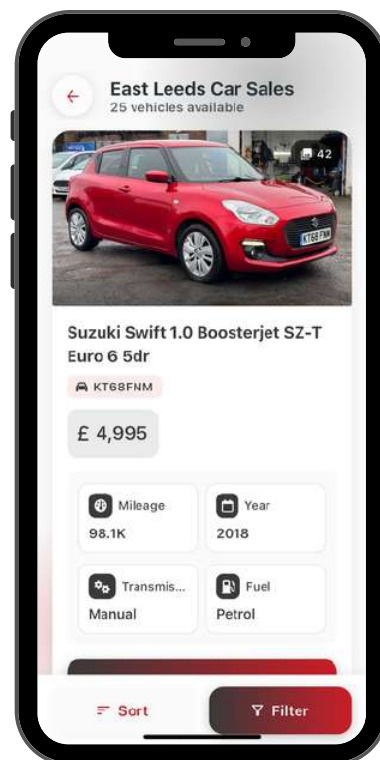

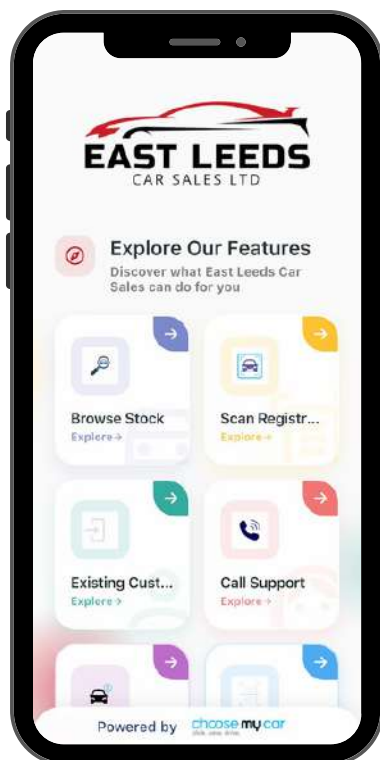

No complaints, no coffee breaks, just pure profit - If you don't do maintenance earn commissions from Motorsync's affiliate 'Click Mechanic'.

More Stock Scope

No more dragging and dropping. Your stock's listed automatically on multiple marketplaces. Choose My Car, Motorsync... Autotrader's still safe — for now.
